Artificial Intelligence II
Homework 2
Vaccine Sentiment Classifier With Feed
Forward Neural Networks

Anna-Aikaterini Kavvada - cs22100009

December 23, 2021

Professor: Manolis Koumbarakis

Class: YS19 - Fall 2021

Exercise 1

See ex1.pdf in folder

Exercise 2

See ex2.pdf in folder

Exercise 3

All documentation for the project can be found in the two Colab notebooks.

- **HW2_AI2.ipynb:** This notebook contains the experiment for the Vaccine Sentiment Classifier With Feed Forward Neural Networks paired with TFIDF vector for the features.
- **HW2_AI2_take2.ipynb:** This notebook contains the experiment for the Vaccine Sentiment Classifier With Feed Forward Neural Networks paired with GloVe embeddings.

My general remark for this project is that no matter what you do in terms of hyperparameters and algorithms, the bottomline and the great difference in the final results comes from both the quality and quantity of the train and test dataset provided.
